PROFESSIONAL SUMMARY

B.Tech student specializing in Artificial Intelligence and Data Science with expertise in Data Analysis, Machine Learning, Natural Language Processing, Statistical Modeling, and Business Intelligence, applying analytical skills to solve complex data challenges and deliver actionable business insights.. Proficient in Python, SQL, Power BI, and Data Visualization tools. Developed predictive models, analytics dashboards, and AI-driven applications during internships and academic projects.

EDUCATION

The Apollo University

CGPA: 9.18

Bachelor of Technology in Artificial Intelligence & Data Science

EXPERIENCE

Data Science Intern – Cognifyz Technologies

Mar 2025 – Apr 2025

- Executed data cleaning, preprocessing, and exploratory data analysis on 4 datasets using Python, enhancing data quality and supporting actionable insights.
- Leveraged Machine Learning techniques on real-world datasets to develop predictive models that improved forecasting accuracy by 96%
- Created visualizations and analytical reports to support data-driven decisions.
- Improved model performance through feature engineering and evaluation techniques.

AI Powered Data Analysis Remote Internship – Excelerate

Jun 2026 – Jul 2026

- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) on real-world datasets.
- Created interactive dashboards and reports to support data-driven decision-making.
- Collaborated with cross-functional teams to analyze business data and identify actionable insights.
- Utilized Excel, SQL, Python, and Power BI for data analysis and visualization.

PROJECTS

Real-Time Fake Job Detection System

2025

Technologies: Python, NLP, Scikit-learn, Streamlit

- Developed an AI-powered fake job detection system using Natural Language Processing techniques.
- Built and trained a Random Forest classifier for fake job prediction.
- Applied SMOTE to handle class imbalance and improve model performance.
- Deployed an interactive Streamlit web application for real-time job classification.

Cloud-Based File Storage & Sharing System

2025

Technologies: HTML, CSS, JavaScript, Firebase

- Developed a secure cloud storage application with Firebase Authentication.
- Implemented file upload, download, sharing, and cloud storage functionality.
- Designed a responsive user interface using HTML, CSS, and JavaScript.
- Integrated Firebase services for secure user authentication and real-time data management.

Voice-Based Shopping Assistant

2026

Technologies: Python, Speech Recognition, HTML, CSS, JavaScript

- Developed a voice-enabled shopping assistant using Speech Recognition for hands-free product searches.
- Integrated product search across multiple e-commerce platforms to provide real-time results.
- Designed a responsive web interface using HTML, CSS, and JavaScript for an enhanced user experience.
- Improved shopping accessibility through voice commands and intelligent product retrieval.

Smartphone Addiction Tracker

2026

Technologies: Python, Streamlit, Pandas, Data Visualization

- Developed a digital wellbeing application to monitor screen time and application usage.
- Built interactive dashboards to visualize daily and weekly usage patterns.
- Implemented addiction scoring and personalized usage alerts to encourage healthy digital habits.
- Generated analytical reports to help users track and reduce excessive smartphone usage.

TECHNICAL SKILLS

Programming Languages: Python, MySQL, Basics of C

Data Analytics: Power BI, Excel, Pandas, NumPy, Data Cleaning, EDA, Data Collection, Data validation, Data organization.

Machine Learning: Scikit-Learn, Random Forest, Classification, Predictive Modeling

Natural Language Processing: NLTK, TF-IDF, Text Processing, Speech Recognition

Databases: MySQL, PostgreSQL

Visualization: Power BI, Tableau, Matplotlib

CERTIFICATIONS

- Google Cloud Engineering Certificate – Google
- Oracle Learning Explorer – MySQL
- NPTEL – Data Analytics with Python
